

SHIPPING CONTAINER TESTING SERVICES

**Innovation.
Integrity.
Dependability.**

Dayton T. Brown, Inc.'s capabilities and expertise support a complete evaluation of your Shipping Container design.

Global trade relies on the ability of shipping/freight containers to resist damage in order for the cargo inside to reach its destination in proper condition. It is no wonder that everyone in the transportation industry understands the importance of thorough testing of shipping containers. Not only must the external container be examined but the manner in which the internal cargo is secured and protected must also be rigorously tested.

Standard and Custom Packaging Testing can be performed in accordance with the requirements of ISO TC 104, ISO 17712, ASTM D4169 and ASTM F1157 as well as any other DOT, Association of American Railroads (AAR) or ISTA certified packaging testing requirement.

- Fork Lift Truck Transport
- Pushing Test
- Towing Test
- Handlift Truck Test
- Rolling Test
- Shock Test
- Overload Test
- Incline-Impact Test
- Concentrated Load Test
- Stacking Test
- Security Seals

DTB is capable of providing first article testing to qualify new manufacturers as well as production lot testing of containers to assure that a manufacturer's production units continue to satisfy all the production requirements of the contract. We can accommodate all containers up to 20 ft. in length, with payloads of up to 6000 lbs. (2,721 kg). DTB can also design and develop containers for specific military and commercial applications, including any interior isolation systems that may be needed to meet shock and vibration requirements.

Our container testing is also used to determine the ability of the packaging and packing methods to provide protection to the contents when the package is impacted on its surfaces or edges. This test may also be applied to unitized loads. DTB is able to provide all of the Fixture Design, Fabrication, Testing Facilities and Engineering for the program on site, at our corporate headquarters in Bohemia, NY.
