Universal Automated Hydraulic Test Stands

Dayton T. Brown, Inc. has 35 years of experience in test equipment design and manufacturing. DTB test equipment is offered in manual, semi-automatic, and fully automatic configurations.

DTB's test equipment is used in acceptance testing for new production or overhauled

- Hydraulic components and assemblies
- Pneumatic components and assemblies
- Electromechanical components and assemblies
- Electrical components and assemblies

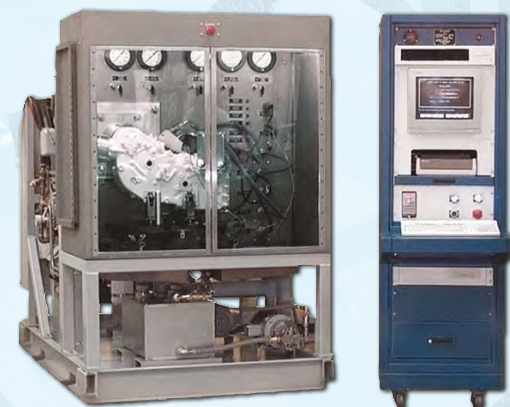

Model MCS-6150 Calibration Cart

Radiator Flushing Stand

DTB's test equipment is used by original equipment manufacturers, military overhaul depots, commercial airlines and maintenance, repair, and overhaul activities to satisfy rigorous production quality assurance requirements.

Our automated test systems feature National Instruments LabVIEWtm software and multi-channel data acquisition components. Automated test reports are provided in user definable formats. Test results can be summarized with PASS/FAIL indications, test limits, unit under test identification and time/date of test.

Model GB6000R Gear Box Test Stand

Model CP/S-6250 Remote Hydraulic Power Supply

DTB offers a complete range of product support services

- Post Installation Technical Support
- Equipment Calibration
- Equipment Maintenance and Assemblies
- Training
- Installation Services
- Repair Services
